## 409. Longest Palindrome

Easy

[2652](#)[155](#)[Add to List](#)[Share](#)

Given a string `s` which consists of lowercase or uppercase letters, return *the length of the **longest palindrome*** that can be built with its letters.

Letters are **case sensitive**, for example, `"Aa"` is not considered a palindrome here.

### Example 1:

**Input:** `s = "abcccd"`

**Output:** 7

**Explanation:**

One longest palindrome that can be built is "dccaccd", whose length is 7.

### Example 2:

**Input:** `s = "a"`

**Output:** 1

### Example 3:

**Input:** `s = "bb"`

**Output:** 2

### Constraints:

- `1 <= s.length <= 2000`
- `s` consists of lowercase **and/or** uppercase English letters only.
