345. Reverse Vowels of a String

Easy   👍 1591   👎 1836   ♡ Add to List   ⬆ Share

Given a string `s`, reverse only all the vowels in the string and return it.

The vowels are `'a'`, `'e'`, `'i'`, `'o'`, and `'u'`, and they can appear in both cases.

Example 1:

```
Input: s = "hello"
Output: "holle"
```

Example 2:

```
Input: s = "leetcode"
Output: "leotcede"
```

Constraints:

- `1 <= s.length <= 3 * 10`^{5}
- `s` consist of **printable ASCII** characters.
